SUMMARY

A skilled front-end developer specializing in React.js. Proven ability to create engaging and responsive web experiences, as demonstrated through personal projects and internship experience. Eager to contribute my skills to a dynamic company with opportunities for growth and innovation.

INTERNSHIP

Jr. React Developer at MeshCraft

6 months

- Contributed to the development of a 3D website, enhancing user engagement and showcasing MeshCraft's capabilities.
 - Integrated interactive 3D models, resulting in an enriched user experience.
 - Displayed 3D assets to a store with sorting and filtering features.
 - [\[Github Link\]](#)
 - React Js, Tailwind CSS, React Three Fiber, GSAP, Framer Motion
-

PERSONAL PROJECTS

Netflix GPT

- A React.js-based web application that mirrors the Netflix user interface and offers AI-powered personalized recommendations.
- Implemented key UI components such as carousels, movie cards, and navigation bars based on the Netflix design.
- Managed state and data flow using React hooks for effective data handling and rendering of recommendations.
- [\[Live Demo\]](#) [\[Github Link\]](#)
- React.js, Tailwind CSS, JavaScript, Google Gemini

Yum Foods

- Developed a modern, responsive food ordering website built with React.js as part of the Namaste React course by Akshay Saini, founder of **NamasteDev.com**
 - Built using React components, making the interface modular and reusable + Optimized for both desktop and mobile views.
 - Using fetch and async/await to retrieve real-time data from an API.
 - Utilized React Router to make the site smooth and fast with client-side routing.
 - Lazy loading, code splitting, and other optimizations for a snappy user experience, and Managed application-wide state using useState and useReducer.
